

Dear Charlotte,

I am responding on behalf of Day Group (representor ID: 952) in respect of the Stage 2 Examination Hearings for the LBH Local Plan.

Follow-up Session – Post-Hearing notes provided following Stage 1 Hearing

Relevant to Day Group's participation in the Stage 1 Hearings – is the EX55 'Rail Safeguarding' Hearing Note. For avoidance of doubt we would confirm that Day Group are in agreement with the matters as detailed in EX55 and EX57, Further Agreed Modifications, as far as relevant to the consideration of matters raised under the Stage 1 Hearings - and comprising specifically issues related to Policy EQ10 Minerals and supporting text as covered by proposed modification EiP_C9_01. In this context issues of 'soundness' we had raised would be addressed by the suggested modification which has been agreed with LBH.

Given the positive engagement with LBH and agreed position reached - we do not see a need to provide a Hearing Statement or to seek to appear at the follow up session on the 12th May. However, we wanted to confirm our position and would be grateful if this could be relayed to the Inspectors. If for any reason the Inspectors have any follow up questions on the matters covered by EX55 we would of course be happy to assist in that respect if required. If you could please advise if that is likely. In any event, a representative for Day Group will be attending the 12 May session to monitor proceedings in an informal capacity so would be available to contribute if required.
